Details of Report.

Details of the report, showing conditions as af May 1. follow:

Winter wheat: Aren to be harvested, \$40,150,000 acres, compared with \$1,555,000 acres, compared with \$1,555,000 acres, large and \$1,000,000 acres, large and \$1,000,000 acres, compared with \$4,550 and April 1 list, \$5,50 and May 1 lest year and \$1.4, the 10 year May 1 average.

The condition is indicative of a yield per acre of approximately \$1.2 bushels, assuming average variations to prevail to harvest time. On the estimated area to be hervested, this would produce \$31,000,000 bushels. The out turn of the cryp will probably be above by below the figures given, according as the change in conditions from May 1 to harvest is above on below the average.
